Summary:
A Full-stack Software Developer devoted to utilizing my acquired programming and interpersonal skills to positively impact organizations. Strong in TypeScript, React JS, Next JS with a focus on collaboration, communication, and willingness to learn.

EDUCATION

Bachelor of Science: Applied Computer Science, 2018-2022   **University of Winnipeg**
- **Relevant coursework:** Data Structures and Algorithms, Advance Internet Programming, Object-Oriented Programming, Web Development, Database Systems

SKILLS

- Figma
- React JS, Next JS, Node JS
- Git, Version Control
- MongoDB, SQL, Sanity
- React Native, Android, and iOS dev

- Communication
- Leadership
- Problem Solving
- Time Management
- **Continuous Learning**

EXPERIENCE

Software Engineer, JSM Masterclass 07/2023 to 01/2024.
A 6-month intermediate coding program.
- Mimics the day-to-day developer workflow while building modern full-stack web apps from start to finish.
- Students are allocated coding tasks which, once completed, are first reviewed by senior engineers who provide feedback to optimize every pull request before the code gets merged into the project.
- Project management, agile methodologies and SCRUM principles are used - with Asana for task management and GitHub for collaboration. Students work in a remote team of developers from around the world.

PROJECTS

- Developed a car rental platform enabling user logins, vehicle uploads, and rentals using MongoDB, NextJS, and Tailwind.
- Developed a full-stack eCommerce web application using React JS, Node.js, and MongoDB to manage web store for On the Block Podcast.
- Built Novlo Films web application using React JS, querying omdb database to return user's favourite films.
- Built a Job search application for developers using NextJS, Tailwind, Redux, RapidAPI.

VOLUNTEER

Web Developer, 10/2022 to present.
RCCG NEW BREED – Winnipeg, MB
- Interviewed and led a team of aspiring web developers in building the church website on WIX.
- Mentoring developers. Created an ebook to share videos and resources that helped me learn ReactJS.
- Work collaboratively with a team of developers, designers, and project managers to meet Organization's goals.
- Researching new technologies and tools that can improve the web development process and implementing them when appropriate.
