MY MISSION

I believe that a clear financial plan has the power to change a person's life, and I have built my entire career around that belief. As a full-stack software developer, I design and build financial technology that gives real people clarity, confidence, and control over their financial future. I take pride in translating complex problems into intuitive, reliable software, and I am committed to continuing to build tools that make sound financial planning accessible to everyone, not just the privileged few.

SKILLS

- C#, .NET REST API Development
- TypeScript, Angular, and React
- Unit Testing
- Visual Studio and VS Code
- Financial Services Industry Experience
- Agile Development and Stakeholder Collaboration
- Database Design (SQL, PostgreSQL, MongoDB)
- Requirements Analysis and Complex Problem Solving
- Verbal and Written Communication
- Rapid Ramp-Up on New Technologies and Frameworks
- Git and Version Control

EXPERIENCE

Software Developer, Assiniboine Credit Union — *Dec 2024 – Present*

- Develop and maintain a large, interconnected internal application used by financial advisors organization-wide, built with **C#/.NET REST APIs** and **TypeScript/Angular**.
- Write unit tests and work daily in Visual Studio and VS Code across a complex, multi-service codebase.
- Refine and confirm requirements with stakeholders, and design solutions that align technical scope with business needs.
- Research and evaluate system observability tooling to reduce time spent logging, debugging, and diagnosing production errors.
- Collaborate with developers and the business systems team on legacy system modernization efforts.

Software Lead, Graceland eCommerce — *Jun 2024 – Present*

- Lead full-stack development of Graceland's eCommerce platform, architecting solutions in **Next.js** and **TypeScript**.
- Design and implement PostgreSQL database schemas supporting order processing, inventory management, and user transactions.
- Conduct code reviews and manage contributions from other developers, setting technical standards for the team.
- Onboard and mentor new developers joining the codebase.

Full-Stack Engineer (Intern), IntuitionPay — *Feb 2024 – Jun 2024*

- Built a React admin dashboard with the developer team to display transactions, analytics, and support administrative functions.
- Developed a multi-step payment form for tuition payments using Zod, React-Hook-Form, and the Shaden library for validation and UI.
- Collaborated with designers and the product team to build a reusable component design system.
- Used React Router, React Query, and SASS modules to manage navigation, data fetching, and styling.

KEY ACHIEVEMENTS

- Built a Financial Goals feature using a .NET REST API that lets advisors track and guide each member toward their financial goals, putting a clearer financial future one step closer for real people. — **Assiniboine Credit Union**
- Presented the problem and proposed solution to my team and stakeholders before writing a single line of code, earning full buy-in and setting the project up to succeed. — **Assiniboine Credit Union**
- Led stakeholder meetings to gather requirements and shape the MVP from the ground up. — **Assiniboine Credit Union**
- Upgraded a legacy ASP.NET Web Forms internal ticketing app in collaboration with developers and the business systems team, a contribution that directly earned me a promotion. — **Assiniboine Credit Union**
- Architected Graceland's Next.js and TypeScript eCommerce solution, driving a 14% increase in revenue from online sales. — **Graceland eCommerce**
- Onboarded two developers into the Graceland codebase, setting them up to contribute quickly and independently. — **Graceland eCommerce**
- Established React, TypeScript, and database management best practices through code reviews, ensuring high-quality code and smooth project execution. — **Graceland eCommerce**

VOLUNTEER

Software Developer Career Mentor, Itoju Mentoring — *Oct 2025 – Present*

- Mentor early-career developers one-on-one each month to help them land their first job in tech.
- Assign real projects and review code to help mentees build a portfolio that gets them noticed.
- Run mock interviews so mentees walk in confident and ready.

Web Developer, New Grads, Local Church — *Oct 2022 – Dec 2024*

- Held mock interviews for new grad developers in my church, helping them break into the industry.
- Built and shared a free eBook packed with the React JS videos and resources that launched my own career.

EDUCATION

Software Engineer Mentee, JSM Masterclass — *Jul 2023 – Jan 2024*

A six-month intermediate coding program.

- Successfully delivered a full-stack application within one quarter, collaborating effectively with a team of four developers to meet project goals and deadlines.
- Developed a modern social media forum with authentication, a dynamic homepage with feeds, post details, creation flows, and live chat using Next.js, MongoDB, and Socket.io.

Bachelor of Science: Applied Computer Science, University of Winnipeg — *2018 – 2022*

- Relevant coursework: Data Structures and Algorithms, Advanced Internet Programming, Object-Oriented Programming, Web Development, Database Systems.
